**Brochure**

Since its inception, Our primary point of focus is to deliver quality. Based in the city of Mumbai, we are one of the leading manufacturers of circular connectors which are known for their capacity to endure the harshest of environments. It is thanks to our understanding and expertise of more than 3 decades that we are now the preferred supplier to many industries like aerospace, railways, defence, infrastructure among many more.

## WHY JETRONICS?

Our complete focus to always deliver quality is why hundreds of customers across the world have chosen us as their preferred supplier. Some of the other reasons why our customers have chosen to work with us over decades are -

- Expertise of more than 3 decades
- Customisation as per industry or customer needs
- Various certifications ensuring high quality
- No MOQ for standard products
- Personal attention and commitment to detail
- Can work with projects of varying sizes
- Quick response and minimal lead time for standard products

## MIL-C-5015 CONNECTORS

Our expertise in manufacturing MIL-DTL-5015 connectors in Threaded and Reverse Bayonet Style which are used in various railways, military as well many industrial applications.

The series is available in a huge range of styles, sizes and variations to facilitate its application to different industries. These multi-pin circular connectors range from 1 pin to 52 pins and can be used for power as well as signal.

We also assist in the customisation of these connectors as per the needs of the customer through various modifications which enhance the usability.

## 26482 SERIES I CONNECTORS

We also offer the MIL - DTL - 26482 series which is a miniature bayonet coupling. This series offers a high-density contact arrangement. They come in a variety of styles and hence offer numerous applications in oil/gas, railways, aerospace, military, and other industries.

## STRAIN RELIEF CORD GRIPS

Another of our offerings is the MS90561 Strain Relief Cord Grips which are designed for heavy duty MIL-DTL-22992 Class L Connectors and meet military specifications and standards. These are corrosion free and provide the necessary strain relief from heavy cable bundles and prevent pull tensions.

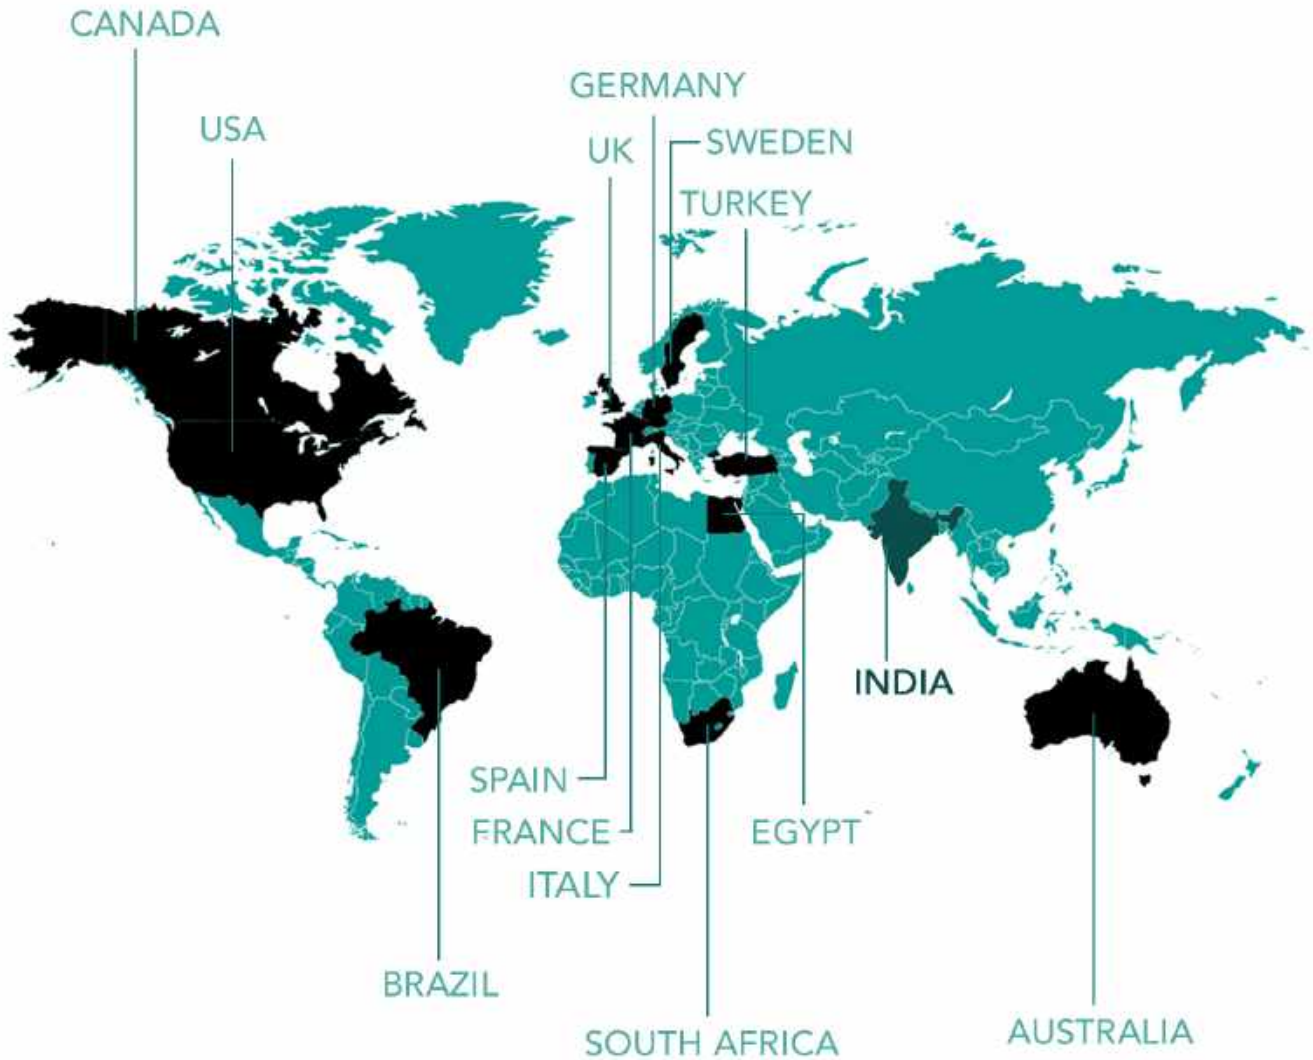

## ALUMINIUM DIECAST ENCLOSURES

We also have aluminium die cast enclosures. These die cast enclosures are manufactured as per European Standard EN 60529 (IEC 529). The make of these enclosures is such that they are shock resistant and have a remarkably high level of anti-corrosive property, dust and water protection and have a temperature resistance of up to 260<sup>o</sup> C. These enclosures are with ingress protection IP68 and are available in various sizes with any RAL shade colour.
